

EZ-FLO Customer Email

Dear Valued Customer,

EZ-FLO International is now part of Reliance Worldwide Corporation, the global leader in push-to-connect fittings.

For decades, EZ-FLO™ and Eastman™ products have been synonymous with premium quality appliance and plumbing connectors trusted by generations of professional installers, plumbers and consumers. Over the years, we have expanded our product lines to include water heater pans, outlet boxes, expansion tanks, and more. Today, every product manufactured by EZ-FLO Eastman carries a long history of quality and innovation.

RWC shares that legacy, and now as one company, we can offer our customers even more top-quality products in more places so you and your customers can access more of the products you trust when and where you need them.

EZ-FLO and Eastman now join SharkBite™, HoldRite™, John Guest™, and Cash Acme™, as a truly powerful line-up of trusted, innovative brands. Combined, we significantly strengthen our supply chain and distribution networks throughout the U.S., Canada and Latin America, expanding the availability of our combined product lines in every channel and market.

Beginning today, we will start integrating the businesses. That said, nothing changes for you immediately. In the near term, you will continue to work with us exactly as you have in the past. Our goal is to make this a seamless transition for customers, and we will not miss a beat in delivering on our commitments.

With this letter, we have included a summary of what you can expect in the initial days and weeks of integration. In the meantime, please do not hesitate to contact your sales representative with any questions you may have. We look forward to serving your ongoing needs.

Best regards,

A handwritten signature in black ink, appearing to read 'Paul Wilson', is written over a faint, dotted grid background.

Paul Wilson
President
EZ-FLO International
